Staters okay 50-cent employee pay hike

Staters have approved a 50-cent pay increase for employees of the state government. The increase will take effect on July 1, 1981. The new pay scale ranges from \$10,000 to \$25,000 per year. The increase is the result of a study conducted by the State Personnel Commission. The study found that the current pay scale was out of line with the private sector. The new scale is designed to bring state pay in line with the private sector. The increase is expected to cost the state approximately \$10 million per year.

Expansion underway at Midland Steel

Midland Steel is expanding its production capacity. The company is investing in new machinery and equipment. The expansion is expected to be completed by the end of the year. The new equipment will allow the company to produce more steel more efficiently. The expansion is a result of increased demand for steel in the construction industry. The company is confident that the expansion will allow it to meet this demand.
